CD process

Type		digital GLCD	capacity [mF]	Max. lead voltage [V]	Inverter/-Transformer	Cycle M8/min	Expandable to mF	weight [kg]	AS 1802D contact gun [St,Va,Ms]	AS 1803D contact gun [St,Va,Al,Ms]	AS 1901 gapgun [St,Va,Al,Mg,Ti]	AS 1811 pinup gun [St,Va]	automation / CNC Interface	Feeding interface
Serie AS1266	The 66 series includes lightweight, portable devices for the thin sheet metal sector for both stationary and mobile use. Due to the modular design, you have the entire product spectrum from the entry-level device without voltage display to the extra-light device with inverter charging unit for maximum performance to offer.													
AS 1266	191-21-266	d	66	220	t	7	78	14,2	xD	xD	xD	-	-	-
AS 1266V	191-21-278	d	78	220	t	6	-	14,3	xD	xD	xD	-	-	-
Serie AS1200	The AS1200 series leaves nothing to be desired. It offers sufficient reserve for the most difficult welding tasks and surfaces up to M10. The extensive equipment such as graphic display, standard capacity switching, day counter, welding parameter library leave nothing to be desired. In addition, this device variant can be equipped with a welding data monitoring, feed interface, CNC interface, or additional power													
AS 1200 Base unit	191-21-200	d	99/66	220	i	12	-	14,8	xD	xD	x	xD	x	-

our CNC studwelders are developed on actual customers needs.
tables from 300x500 up to 2000x6000mm are available.

- Ü HMI with intuitive processing on pc based windows systems
- Ü programmable on DIN66025 (G0 X Y ,G1...)
- Ü servo motor powerd for high dynamic
- Ü economic design
- Ü remote access for service and support over IP
- Ü proved HMI
- Ü turntable applications
- Ü up to 4 axis , X,Y,Z,W
- Ü in house production of tables and studwelders
- Ü max. 6 heads per table
- Ü PT M3-M8 with standard components, special studs on request
- Ü CAD CAM, DXF import
- Ü special tools, milling, spraying...

On base of our in house production we can provide a felexible solution
